Paris, Israel Embassy, April 8, 1962.

TEL AVIV, Monday (TTM).—
The notorious Sidney Stanley, arting through his lawyer here today, submitted a declaration under eath to the Tel Aviv District Court stating that "the claimants cannot sue me as the transaction in question was illegal."

a popular bathing place near the Carmel Beach. For a small charge residents will be able to use wardrobe and showers and will be served by two lifesaving stations. Councilors a g a in demanded that Shabbat transport to the beach and the whole town be assured. The Mayor suggested that the Council discuss the transport question at its next session and reach a decision by which it would stand.

The debate was opened by Mrs. C. Iram, Communist, who demanded that the Council discuss and protest the "U.N. bacteriological warfare in Korea." Only she and Mapam members voted in favour of discussing and protesting.

KILLED MAN'S FUNEBAL yesterday while trying to stop a group of children from quarrelling, took place here to day, in the presence of a large crowd of mourners.

Police stated today that only

ey Conference of Contractors and Builders has decided to discontinue building work throughout the country for three days. The National Centre of the Contractors and Builders Association in Israel demands: a) That any arrangements made by the Government for the control of building will not damage in any way existing building projects of any kind—in accordance with the recommendations of the Economic Council and the promise made by the Prime Minister. b) That the supply of local building materials and of cement to private builders is assured for the completion of 15,000 rooms now under construction. c) That building materials imported by contractors and builders under the import-without-payment scheme are left at the disposal of the contractors and builders. The latter should be permitted in future to utilize these building materials under reasonable terms for private building.

Since January 1861, the Section for Building Materials of the Ministry has refused to allocate coment for private building. The quots of the Nesher Factory has considerably increased and hundreds of thousands of tons of coment have been allocated to different bodies without any investigation as to how these materials were utilized—THE SECTION FOR BUILDING MATERIALS IS REFUSING TO ALLOCATE CEMENT FOR PRIVATE BUILDING.

The Contractors and Builders have, at their own expense, imported building materials under the import-without-payment scheme. They have continued to build with these materials and have constructed thousands of housing units throughout the country. They have engaged tens of thousands of workers and have employed hundreds of manufacturing enterprises and thousands of workings connected with the building industry. The flats have been sold to new immigrants and veterans who have, because of this, not become a burden on the community.

Resulting from the refusal to allocate local building materials at the official prices and owing to the importion of an additional dollar on each dollar, paid for imports, a considerable rise in bu

In these circumstances, the continuation of building is impossible. The suspension of work by the contractors and builders comes only as a protest against the policy of discrimination of the Section for Building Materials, and as a demonstration of the desire of the builders for an organized building programme, without any Black Market dealings. The builders wish to continue their work with materials legally imported and with local materials slicested by the Section for Building Materials.

Private builders are not interested in luture buildings. The majority of buildings erected by private builders are standard buildings which have been sold to new immigrants and veteran fesidents in the country.

The rise in prices of private buildings was a result of the Government's policy. The contractors and builders of
